top view:

illustrate:

1. EVE Lithium Energy LF105 (3.2V 105Ah) battery products are used, and the discharge rate meets the requirements of the motor working conditions and power (rated 30kw, peak 60kw);
2. The battery system consists of 1 box + 1 PDU, including modules, sheet metal parts, BMS modules, electrical components and accessories, etc., and communicates with the external vehicle through the low-voltage aviation plug interface;
3. The overall waterproof level meets the requirements of IP67;
4. In this design scheme, the space utilization is compact, and the maximum external dimension (L\*W\*H) of a single box is 1000\*500\*500mm.
