About Us

Professional RFID total solution provider

Haier's shareholding company

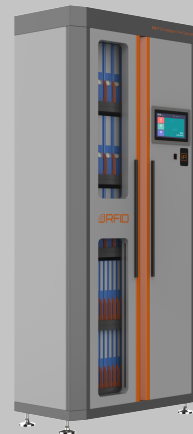

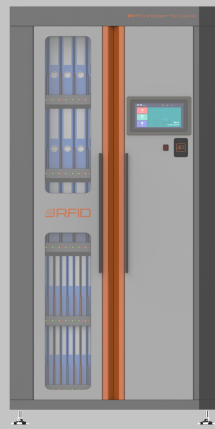

Drafter of standard GB/T37026-2018

Drafter of standard IEEE P2786

Impinj's gold value added partner

Application

Slow inventory, inconvenient locating and troublesome authorization are the pain points of traditional document management. RFID Filing Cabinet is developed by Pinguo to solve such problems. Mainly used in banks, governments, and offices. It's integrated with a metal cabinet, RFID system, and computer system. When someone wants to take the file out, just get the permission by finger print or face recognition, input the key words of the document, and the cabinet will open and shows the exact position with an indicator light. No time is wasted for searching any more. Also, the authorization can be made remotely by APP.

- ✓ High accuracy of document identification up to 100%
- 🔍 Automatic and quick inventory of documents
- 🔒 Support long-distance control of opening and closing with an APP
- 📄 Support disordered input & output
- 🧩 System can be expanded with multiple interfaces

Parameter

Name : RFID Filing Cabinet

Model : TG-CT-ST021

Material : Cold rolled steel

Color :  

Dimensions : 1,750×800×450mm

Working Temperature: -20°C/+60°C

Volume : 100*5 PCS

Precision : Item-level

Indicator : LED

Inventory Rate : ≥1,000 PCS / min

Accuracy : 100%

Power Supply : AC220V

Inventory Mode : Active or passive inventory

Lock Control : Electronic

Interface : RS232,RJ45,TCP/IP

Emergency Mode : Mechanical key

Monitoring : Real-time
