Description

About Us

Professional RFID total solution provider

Haier's shareholding company

Drafter of standard GB/T37026-2018

Drafter of standard IEEE P2786

Impinj's gold value added partner

Application

Low efficiency of checkout and stealing are the pain points of retail stores. RFID Self-checkout is developed by Pinguan to solve such problem. Mainly used in supermarket, convenience store and shopping mall. It's integrated with RFID system, computer system and access control system. The bill will be shown on the computer immediately while customer put all the goods in the checkout area. And the gate opens automatically after checkout in various ways. Compared with barcode scanning, it has the advantages of batch reading, high efficiency, high accuracy based on RFID technology. No staff is needed for checkout process. EAS is not needed additionally.

Various ways to checkout like wechat, alipay, member system, etc

Better shopping experience without long queues

Less cost of retailer with fewer staff

Better cost performance with more integrated management system

Parameter

Name： RFID Self-checkout	**Model：** TG-UT-CS020
Dimensions： 615×500×1690mm	**Color：**
Working Temperature： -20℃～+65℃	**Material:** Steel
Storage Temperature ： -15℃～+45℃	

Frequency： 902～925MHZ	**Protocol：** EPC C1G2/ISO18000-6C
Antenna ： Built-in high performance antennas	**Rated Power：** 32.5dBm
Barcode： 1D,2D	**Power Supply ：** AC 220V
Interface： RJ45*1,USB*2	**Rated Power ：** <300W
Protection Level： IP5X	**Computer：** Industrial
Monitor： 7 " 、IPS	**System：** Windows
