Description

Application

Picking several PCS of goods out of batches is a difficulty of warehousing management. RFID Kiosk is developed by Pinguan to solve such problem. Mainly used together with RFID tunnel. It's integrated with RFID system and computer system. Showing the identification result on the computer when the goods are put into the reading area. Compared with barcode scanning, it has the advantages of batch reading, high efficiency, high accuracy based on RFID technology.

About Us

Professional RFID total solution provider

Haier's shareholding company

Drafter of standard GB/T37026-2018

Drafter of standard IEEE P2786

Impinj's gold value added partner

High read-write rate at 0.3 seconds/time

Strong anti-interference ability

Visual checking result which helps find the target goods easily

The appearance conforms to ergonomics, convenient for using

Parameter

Name : RFID Kiosk

Model : TG-UT-IM010

Dimensions : 520×520×1530 mm

Color :  

Storage Temperature : -20°C~ +80°C

Working Temperature : -10°C~ +40°C

Frequency : 920~925MHZ

Protocol : EPC C1G2/ISO18000-6C

Antenna : Built-in high performance antennas

RF Power : 32.5dBm

Reading Range : ≤60cm

Power Supply : AC 220V

Protection level : IP5X

Rated Power : <200W

Interface : RJ45,wifi

Computer : Industrial

Monitor : Industrial, touching type above 19 "

System : windows
